EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 2, line 8, "said0d" has been changed to ---said---.

2. The following is an examiner's statement of reasons for allowance: the prior art does not teach or disclose an organic EL element drive circuit for current-driving organic EL elements comprising, in combination with the remaining features of the claim, switch circuits for resetting organic EL elements; peak current generator circuits; a reset inhibit circuit for inhibiting a resetting by switch circuits and stopping generation of the peak currents by the peak current generator circuits; and determination means for determining whether the drive current for the current display period is substantially the same as that in the display period of a next horizontal scan line, the reset inhibit circuit being actuated to inhibit the resetting and stopping the generation of the peak current when the determination means determines that the drive current for the display period of a current display period is substantially the same as that of a next horizontal scan line.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
